*This document provides a Safety Data Sheet (SDS) for nonwovens on a voluntary basis according to EDANA recommendations. The SDS is a mean of transferring essential hazard information from the supplier of a nonwoven product to the recipient of the product. As nonwovens are generally not hazardous, SDS for nonwovens is not legally requested but must be considered as information. It is inspired from the EC recommendation for SDS.*

*The information contained in this Safety Data Sheet has been developed by the company on the express request of its customers and to the best of its knowledge. Therefore, the company does not assume any liability with respect to the correctness and/or completeness of the information provided by this SDS. The customer in particular shall not be released from his duty to check all safety relevant properties of the delivered nonwovens and to refer to the official texts for full information on the local obligations.*
